Data Card: Anonymized Resume & Job Description Corpus

Project: Resume & Job Description Extractor

Dataset Specifications

Dimension	Details & Documentation
1. Source	• **Public Resumes:** Kaggle Updated Resume Dataset (https://www.kaggle.com/datasets/snehaanbhawal/resume-dataset) • **Public Job Descriptions:** Hugging Face Job Descriptions (`https://huggingface.co/datasets/jacob-hugging-face/job-descriptions`) • **Created Synthetic CVs:** 10 structured graduate CVs having each with GPAs, and bilingual terminology.
2. Size	60 resume documents (1–2 pages each, ~450 tokens per resume) and 15 Job Descriptions (~300 tokens each), totaling 75 documents (~90 pages, ~31,500 tokens)..
3. Language & Format	English and bilingual Arabic/English terms; stored as single-page and two-page PDF documents (`.pdf`), structured plain-text files (`.txt`), and evaluation metadata (`.csv`).
4. Sensitive Content	All personally identifiable information (PII)—including candidate names, phone numbers, email addresses, street addresses, and personal URLs—was removed via regex scrubbing and manual review. Each file is assigned an anonymous token (`CV_01` through `CV_60`) and marked with `[REDACTED - ANONYMIZED FOR PRIVACY]`.
